

-----USER MANUAL-----

BookMark is an easy to use bookstore software which allows user to view, store and manage books.

All the functions of the following numbers are shown below:

1. Search by Price: This button searches all the available books by price. User just needs to enter the price of book and will get the book details.
2. Search by Genre: This button gives the total number of books available in the particular genre.
3. Display: All the book details are shown in this box

4. Add new Book: User can add new books by filling all the details.
5. Add Item: This button adds book to the table above.
6. Clear: This button clears all the details the user has given in the ADD NEW BOOK section.
7. Menu Bar
 - a. File: It has 2 options which are Open and Exit. Open lets you to open the text file which has the book details and lets you to add the text file in the book details table. Exit option closes the software.
 - b. Edit: It has 2 option. Delete selected row and clear table. To delete the row, user needs to first, select the row and go to edit and click on delete selected row. Clear table deletes all the book details from table.
 - c. Help: It has a manual option. It opens the user manual.
